Liberec, CZ · remote or hybrid (Liberec / Prague)

Frontend architect and team lead for banking, insurance, energy and automotive. I design platforms many teams ship on — microfrontends, typed contracts, design systems — and still read the diffs. I use AI every day, with one hard rule: it speeds me up, it doesn't steer.

SELECTED ENGAGEMENTS — CLIENTS UNNAMED BY DESIGN

insurance	**Core-system rebuild — FE architect & developer** Microfrontend architecture across cross-domain teams; built the framework dozens of FE developers use daily. Largest engagement to date (~1.5 years).
public sector	**Mobile-first self-service app — FE solution architect & team lead** Public-facing, no-install web app: state-registry integrations, document scanning, GPS.
energy	**Sales digitalization — team lead & microfrontend architect** Paperless tablet sales portal integrated with SAP/DMS; end-to-end online customer acquisition incl. e-signing (OpenID); call-center dashboard.
energy	**Sales & customer portals — analysis** Requirements, target architecture, integrations and functional specification the delivery team builds on.
banking	**Online account opening — developer** Fully online onboarding incl. KYC and identity verification.
automotive	**Federated platform modules — React microfrontend developer** Federated modules inside a shared platform shell (~1 year).

EMPLOYMENT

2021 – now	**Trask** — senior frontend developer → architect & team lead — banking, energy, insurance
2019 – 21	**Lundegaard** — JavaScript developer — React & Angular on large corporate applications
2018 – 19	**Trask** — JavaScript developer — Angular, JSP, a bit of Java
2015 – 17	**C26.cz** — programmer — PHP, C, jQuery, and my first clients

OPEN SOURCE

`biome-you-might-not-need-an-effect`
Biome linter plugin detecting unnecessary React useEffects. On npm.

`construe`
Natural language → validated structured output; React-first, provider-agnostic.

`openclaw-guardian`
Rate-limit-aware proxy & session healer for the Claude API. Zero dependencies.

`companion`
Desktop app visualizing Claude Code activity live via hooks.

STACK & FACTS

`daily`
React · TypeScript · TanStack · Hono · Drizzle · Astro · MUI · Vite · Biome

`environment`
vim · tmux · Claude Code · Docker · GitLab CI · Jenkins · OpenShift

`certifications`
AWS Certified Cloud Practitioner · Cisco CCNA (4×) · Anthropic Claude 101, Claude Code 101 & in Action

`languages`
Czech native · English & German working proficiency

`also`
mentoring · internal AI talks · estimation clients plan releases on
